

Automatic Bottle Washer

WWB-100

Speed up your bottle washing and filling operation dramatically by adding one of our WWB-100 automatic bottle washers to your washing and filling system. Unlike other machines that are simply converted dishwashers, our WWB-100 is designed from the ground up as a bottle washer. It's built in, adjustable timer makes it perfect for washing either water bottles or wine and beer carboys.

- The manufacturer of our WWB-100 has been a leader in the field of commercial dishwashing since 1945.
- These machines are constructed to industrial standards and are built for thousands of duty cycles.
- Unique 4 bottle/cycle loading capacity.
- Fresh water wash and rinse cycles.
- Adjustable wash cycle of up to 3 minutes.
- Rinse cycle—30 seconds.
- High temp 140°F wash, 180°F sterilizing rinse.
- 2 gal 5KW insulated hot water booster for 180°F rinse.
- Integrated chemical feed pump.

Pictured above: One of our WWB-100s in the open position.

- Quick cleaning waste filter.
- Simple, one button operation.
- Integrated safety interlocks.
- 16 gauge stainless steel construction.
- Large 17" unobstructed chamber opening.
- Convenient bottom shelf for storage.
- Same model can be installed in either straight or corner position.

Electrical requirements:

- 240V—30 amps, single phase.

Dimensions:
